Abijeet Dhillon	Member
Connor Cahoon	Member
Robert Yacovelli	Member

✏️ Sprint planning meeting items

Previous sprint summary

Sprint theme	Functionality and visuals
Issues completed	16
Issues left	20+
Team Capacity	100%
Summary	<ul style="list-style-type: none">❖ redid the login and registration using JS❖ Optimized the fire page for mobile viewing❖ Added logic to the precipitation widget so the rain animation adjusts its' intensity based on the precipitation value of the current station's data❖ Added a find me button in the top right of the map to display data of the station closest to the user❖ Fixed errors that were logged to the console when data was undefined❖ Added phone in the registration flow

	<ul style="list-style-type: none"> ❖ Added all the fire widget's JavaScript methods to updateDataHTML, so that they populate when a date and weather station are selected. ❖ Added Twilio integration ❖ Added a profile page ❖ Users can add/delete/view their favourite stations ❖ User profiles are made at registration ❖ User default home screen differs based on User Type (Common user vs. Fire Fighter) ❖ Formatted UI to look better as a whole, increased cohesion ❖ Reworked bootstrap to function as expected on mobile
